In Collaboration with

Confederation of Indian Industry

CII-ITC Centre of Excellence
for Sustainable Development

National Conference on
Sustainable Development in India:
Economic Issues & Policy Initiatives

3rd – 4th March 2016: Amity University Campus, Noida, Uttar Pradesh

About the Conference

Development theory has come a long way over the last century. It began with focus on economic growth and development, and eventually has reached a stage where researchers, governments and academia are looking at more holistic patterns of living than merely growth. Sustainable development, eventually, has become the most important notion of the day, and provides a more comprehensive definition of development, linking up ecological services and quality of life with economic growth. Such a paradigm shift in a phase of less than a century is no less than a revolution.

The onus is upon UN to replace the Millennium Development Goals with Sustainable Development Goals. “Change yourself, instead of changing the environment to suit your needs.” Amity School of Economics takes this up for India in particular under the “Make in India” mission of Hon. Prime Minister and is organizing a two day National Conference on “Sustainable Development in India: Economic Issues and Policy Initiatives” in collaboration with CII-ITC, a center for Sustainable Development.

Objectives

The conference focuses at addressing the issue of Sustainable development and more specifically aims to achieve the following:

1. To offer a national platform for the professionals, researchers and academicians to share their intellectual expertise and research acumen
2. To encourage and motivate young budding research scholars to understand the intricacies of Sustainable development and undertake the challenges of working on this paradigm.
3. To identify specific inter-regional needs and build consensus that would help India to attain sustainable development
4. To suggest Economic policy initiatives in regard to sustainable development for India.

Call for Papers:

Original papers, those are not under review elsewhere, along with abstract are invited. The abstract should not be more than 300 words with 3-5 keywords, typed in Times New Roman 12 font size with a title page indicating title of the paper, names, affiliation, complete mailing address, telephone number and email id of the authors may be submitted as an e-attachment in MS word to the Conference Convener at aseconference2016@gmail.com latest by 30th January 2016

About ASE

Amity School of Economics incepted in the year 2009, offers undergraduate Honors, Post Graduate and Doctoral Programmes in Economics. Under the guidance of the University the main focus of the School is to inculcate holistic development, professional excellence and moral & ethical values of its aspirants with research at its epicenter.

About CII-ITC Centre of Excellence for Sustainable Development

Our world is entering an age of unprecedented risks and opportunities. There is immense pressure on our natural resources, carbon emissions are alarmingly high, and inequalities are increasing. The environment is suffering as are the people. In light of this, sustainability has become a major concern for businesses. It pressurizes them to adapt accordingly so that their practices meet the need of the changing environment.

That's where we come in. We nurture our clients to compete, expand opportunity and excel in today's dynamic business environments. The Centre works to create and sustain an environment conducive to the growth of business, partnering business and government alike through training, advisory and consultative services. These services comprise capacity building and training programmes and workshops related to environment policies, management systems, management frameworks, performance assessment, sustainability reporting, stakeholder engagement, sustainability assurance, climate change, sustainable business portfolios and business model innovation to name a few.
