

The CII-ITC Centre of Excellence for Sustainable Development (CESD) invites application from interested professionals to join its team in Delhi-NCR.

We are on a mission to provide innovative ideas and solutions, in India, and globally, to enable business, and its stakeholders, in sustainable value creation. We do so by providing knowledge, capacity building, and recognition services to business.

Rapidly expanding urban areas, such as the National Capital Region (NCR), are affected by ambient air pollution across most of the calendar months. Many schemes and measures have been implemented, in a reactive manner, with limited impact and acceptance. The recently notified Graded Response Plan for addressing ambient air pollution in Delhi is again a reactive approach.

Air-shed Management at a city level for managing the air emissions and associated pollution, is a complex task that requires long-term commitment and actions from multiple stakeholders including industry, government, civic bodies, and citizens. With an objective to bring-in synergy while making efforts for addressing the air pollution in Delhi, CII has partnered with Niti Aayog for an initiative-Cleaner Air Better Life.

CESD is seeking a suitable candidate to assist in management of the initiative and coordination with diverse stakeholders, including Industry, Government, Academia and relevant civil society groups. The eligible candidate is to meet mentioned qualifications/skill set for a mid-management position.

### **One Position: Associate Counsellor**

#### **Job Summary**

CESD is seeking a suitable candidate to assist while managing CII-Niti Aayog Cleaner Air Better Life Initiative with the purpose of ensuring synergy amongst diverse stakeholders through efficient coordination and effective communication.

#### **Key Responsibilities**

- Assist the Initiative by organising the relevant stakeholders meeting and document the insights emanating from focused group discussions.
- Provide support in creating objective specific task forces, as identified under the initiative.
- Undertake required metadata research on the issue of air pollution and bring out knowledge papers for a better outreach and dissemination of information amongst diverse stakeholders.
- Under the initiative, document key actions taken by relevant stakeholders and prepare an outcome report, as advised by Chairman of the initiative.
- Create a communication strategy for sensitisation of general public on their role while addressing the air pollution, besides communicating about key actions undertaken by the initiative.

#### **Minimum Qualifications and Experience**

- Applicants must have received a master's degree in environmental science, climate change science/policy, energy management, or a closely related field.
- Aware of the concept of air shed management and associated interface with all stakeholders.
- Has prior work experience in the domain of air pollution control and associated research.

- 5-7 years of experience with environment regulations, environmental data modelling and waste management.

**Demonstrated skills**

- Strong project management skills
- Strong analytical and research skills
- Ability to work effectively in teams as well as independently within tight timelines
- Excellent in oral and written communication; have skills to write independent reports, documents, maintain systems and procedures in project administration.

**Compensation**

Offers shall be commensurate with the qualifications, experience, and salary history of the selected candidate

**Location**

National Capital Region

Confederation of Indian Industry is an equal opportunity employer.
