### **Key responsibilities:**

- Undertake technical analysis and data management in Indore to work as a part of the core team housed at Delhi and support the ongoing research on air pollution
- Assist your core team for programme development, designing new solutions, primary data collection and adherence to overall project timelines
- Collect and synthesise data and information related to urban air quality as per the specific needs of project or as directed by your manager
- Liaise and engage stakeholder agencies including local policymakers, government agencies, businesses, communities on the ground
- Support project team with material and coordination for bilateral meetings or workshops
- Lead overall supervision and management of surveys/data collection, assist field team of community volunteers, and oversee field surveys
- Conduct data analysis and ensure secure data transmission from field team to the research team.

### **Job requirements:**

- Demonstrated knowledge of managing air pollution mitigation projects in implementation or research settings is strongly preferred
- Educational background, preferably masters, in relevant areas such as environmental science/engineering, sustainable development, urban studies etc.
- Skills in managing air quality monitoring instruments, survey data collection and analysis are preferable for this job
- Good team player who can execute the job by coordinating tasks across the team, is eager to learn and acquire new skills as required by the job and applies feedback constructively
- Experience in working with government officials in Madhya Pradesh is preferred
- Ability to articulate scientific/technical matters to a non-expert audience.
- Excellent oral and written communication skills, both in English and Hindi, are required

**Salary:** Commensurate with educational background and professional experience.

Write to [saif.khan@cii.in](mailto:saif.khan@cii.in) with your latest 'one-page' curriculum vitae and a cover letter in the email, not exceeding 400 words, explaining why you would like to be associated with CII CABL initiative or what makes you an ideal candidate for this job. Most importantly, please label your subject line as "Job Application: your full name".
