UNLOCKING SUSTAINABLE GROWTH

India is the second largest producer of coal and crude steel, with increasing year-on-year production of minerals like zinc, lead, sillimanite, according to IBEF, 2022. Metals and mining are a vital cog in India's economy, contributing close to 2 percent to India's GDP, according to Hindu Business Line. But to unlock sustainable and long-lasting growth, Indian businesses must now turn towards managing natural resource wealth responsibly, reducing carbon emissions, and protecting human rights of vulnerable communities.
