

We are honoured to have Shri Rohit Kansal, Additional Secretary, [Ministry Of Textiles](#), Government of India, present at the 19th [hashtag #CIISustainabilitySummit](#) for the launch of our new tool and website.

At [Eco Edge- Integrating Sustainability in Value Chains of Companies](#), we are committed to driving sustainability within company value chains. We are pleased to announce the launch of our new and advanced tool, designed to revolutionize sustainability assessments and streamline the process for companies.

Our new tool offers the following key benefits:

- Faster Assessments: The evaluation turnaround time will be significantly reduced, enabling quicker decision-making.
- Data Analytics: The tool will be a comprehensive data repository, allowing in-depth analysis and crucial insights for evidence-based sustainability policies.
- Sectoral and Cross-Sectoral Best Practices Sharing: The platform will facilitate the sharing of best practices within and across sectors, enabling companies to adopt and integrate proven sustainability strategies.

The tool conducts assessments across a range of critical indicators:

- Environmental Indicators: Monitoring scope emissions, alternative energy sources, water management, life cycle analysis, recycling and reusing practices, and sustainable packaging.
- Social Indicators: Covering human rights due diligence, employee well-being and benefits, operational and customer health and safety.
- Other Indicators: Additionally, companies are required to provide information on sector-specific indicators to ensure a comprehensive assessment.

We aim to empower businesses with actionable data that enables them to efficiently integrate sustainability into their value chains.
