

Integrating sustainability into the value chains of companies is not just an environmental and ethical move, but also a strategic step. It is an opportunity for businesses to drive innovation, ensure long-term profitability, and contribute positively to both society and the environment, while promoting economic growth and resilience on a global scale.

On 22nd April, as we celebrated [EarthDay2023](#), we had the privilege of distributing participation certificates to selected suppliers and dealerships of [Škoda Auto Volkswagen India Private Limited](#) as part of the pilot initiative of [Eco Edge- Integrating Sustainability in Value Chains of Companies](#).

These selected partners attended awareness training and capacity building that address targets like decarbonisation, circular economy, health and safety and human rights.

Let's collaborate and make a meaningful impact towards our shared goal of a greener, cleaner, and more sustainable future. Together, let's showcase India's transformative journey to the World.
