

Circular Economy Conference 2026

Mainstreaming circular economy

27 October 2026 | New Delhi

Overview

Circularity is integral to business competitiveness, future-readiness, supply chain resilience, and long-term value creation: it is a lever for achieving the vision of Viksit Bharat by 2047. However, the imperative is to move beyond recycling and isolated pilots, towards a *systematic adoption and scale up of circular practices across the value chain*.

To anchor this transformation, industry must focus on four critical pillars

1. **Metrics**
2. **Reverse logistics**
3. **Standards**
4. **New business models**

The *CII Circular Economy Conference 2026* will bring together industry leaders, policy makers, and practitioners to deliberate on these priorities and explore what it takes to mainstream circularity across the economy, sectors and value chains.

Highlights

Launch of circularity measurement framework

Sector-focused deep dive into circularity opportunities and challenges

Exclusive senior leadership workshop

Announcement of *CII Sustainable Plastic Packaging Awards 2026* winners

Why participate?

To gain understanding of critical pillars that drive circular economy practice

To learn how to operationalise circular economy principles from thought leaders and practitioners

To connect, exchange ideas, and explore opportunities for collaboration and partnership
