## PHYSICAL CLIMATE RISK- QUANTIFIED

### Climate Risk Intelligence for a Resilient Future

- **Anticipate** climate risks and exposure
- **Prioritize** vulnerable assets and supply chains
- **Strengthen** resilience through informed action

Climate risk intelligence tool for assets and supply chains, enabling leadership to anticipate exposure, prioritize action, and prevent losses across assets and supply chains across operations.

# Climate Data to Climate Intelligence

## HOW IT WORKS

01

### ASSESS

Facilitates grading of every location and asset on 6 climate hazards

02

### FORECAST

7-day early warning and Climate Scenario outlooks until 2050 and 2080.

03

### QUANTIFY

Impact into financial metrics: exposure, business-interruption loss, single points of failure.

04

### ACT

Prioritize resilience investment and adaptation by cost-benefit.

Portfolio risk

### Protect Capital

Safeguard assets, revenue and continuity against escalating climate shocks.

Suppliers and routes

### De-Risk the Chain

Flag single points of failure across Tier-1/2 suppliers before they cascade.

Strategic interventions

### Data-backed decision making

Ground capital and resilience decisions in science with sustainability-ready reporting.

# Build Resilience with Climate Intelligence

## Forward-Looking

Move beyond historical climate data.

## Location-Specific

Understand risk at the asset and geographic level.

## Supply-Chain Ready

Extend climate-risk screening beyond organizational boundaries.

## Decision-Oriented

Translate climate information into actionable business intelligence.

## Built for Resilience

Support informed climate adaptation and resilience planning.

## Explore ClimaQ

Understand your climate-risk exposure. Identify priority areas.

Start building resilience.
